Beautified Response:

PHASE 4

ADVANCED TECHNIQUES

CoT — Chain-of-Thought Prompting

Instead of asking for an answer directly, ask the AI to explain its reasoning step by step.

Interactive CoT — Test Plan

Prompt:

Ask me 8 multiple-choice questions (MCQs), one at a time.

- After I answer each question, proceed to the next question.
- Do not ask all 8 questions at once.
- Wait for my response before proceeding to the next question.
- After all 8 questions are completed, generate a Test Plan for the Core Banking module, covering payment transfer scenarios.
- Generate the final Test Plan in `.docx` format.

IMPORTANT:

GO QUESTION BY QUESTION.

Interactive CoT — Investigate an Automation Failure

Prompt:

Act as a Test Automation Engineer and investigate why my automated test passes locally but fails in the CI environment.

Follow these instructions:

1. Ask me 5 questions, one at a time.
2. Base each subsequent question on my previous answer.
3. Request code, logs, screenshots, configuration files, or other evidence whenever useful.
4. Wait for my response before asking the next question.
5. After completing the investigation, provide the findings in the following table:

Cause	Evidence	Verification
Identified cause	Supporting evidence	How the cause was verified

6.
 - Clearly distinguish between:
 - Confirmed: Supported by evidence.
 - Hypothesis: A possible cause that has not yet been verified.
7. Do not claim a cause without supporting evidence.

IMPORTANT:
START WITH QUESTION 1 ONLY.

✨ Magic Phrases

Useful phrases for encouraging step-by-step reasoning include:

- “Let’s think step by step.”
- “Walk me through your reasoning.”
- “Show your work.”

10) S10-TextToSpeech-TTS-Home Assignment

Request:

```
{  
  "model": "canopylabs/orpheus-v1-english",  
  "input": "I love building and shipping new features for our users!",  
  "voice": "autumn",  
  "response_format": "wav"  
}
```

Response:

The screenshot shows a REST client interface with the following details:

- URL:** `https://api.groq.com/openai/v1/audio/speech`
- Method:** `POST`
- Body:** A JSON object with the following fields:

```
{  "model": "canopylabs/orpheus-v1-english",  "input": "I love building and shipping new features for our users!",  "voice": "autumn",  "response_format": "wav"}
```
- Response:** `200 OK` with a status of `818 ms` and a size of `214.58 KB`.
- Audio Player:** A media player showing a duration of `0:00 / 0:04`.

11. S011-Multilingual-Language-conversion-Home Assignment

Request:

```
{  "model": "openai/gpt-oss-20b",  "messages": [    {      "role": "system",      "content": "Act as a Language Translator translating the user instructions in specified language"    },    {      "role": "user",      "content": "Hello Good Morning .Transalte in Arabic"    }  ]}
```

Response:

```
{
  "id": "chatcmpl-ee4cd601-bc50-4b92-b0e6-69609c3022b4",
  "object": "chat.completion",

  "choices": [
    {
      "index": 0,
      "message": {
        "role": "assistant",
        "content": "***Arabic translation:**\n\n- “Hello” → **مرحبًا** \n- “Good Morning” → **صباح الخير**\n\nSo, together you can say: **مرحبًا صباح الخير**.",
        "reasoning": "The user says: \"Hello Good Morning .Transalte in Arabic\" They want translation of that phrase into Arabic. The phrase: \"Hello Good Morning.\" The user typed \"Transalte\". Probably want translation. We can provide Arabic translation: \"اصباح الخير\" (Good morning) and \"امرحبا\" (Hello). Combined: \"اصباح الخير مرحبا\". Or \"اصباح الخير\" is greeting. We could say \"اصباح الخير\" covers both. But the user wrote \"Hello Good Morning .Transalte in Arabic\". We should translate entire phrase. \"Hello Good Morning.\" -> Arabic: \"اصباح الخير مرحبا\" but the order? Typically \"اصباح الخير\" means Good morning. \"امرحبا\" means Hello. The natural Arabic greeting is \"اصباح الخير\". Could do \"اصباح الخير مرحبا\" though it's redundant. I'd give translation: \"اصباح الخير\" (for Good morning) and \"امرحبا\" (for Hello). Maybe they want one phrase: \"صباح الخير\". I'd respond: \"اصباح الخير\" (Good morning) and \"امرحبا\" (Hello). Or combine: \"صباح الخير مرحبا\". Let's respond accordingly."
